RROne · Razorpay signup

Step by step, before any app changes

Start here: https://razorpay.com/

Click Sign Up. The form opens at https://accounts.razorpay.com/auth/?screen=sign_up. Choose India.

Do this on the shop owner's phone or laptop. Keep the owner's PAN, the phone linked to that PAN, and the shop bank passbook nearby. Use a quiet room with a working camera in case they ask for a video call.

1. Create the login

1. Enter the owner's email or 10-digit mobile number. Use one the owner checks every day.
2. Create a password. Meet every rule shown under the box, usually a mix of capital letters, small letters, a number, and a symbol.
3. Click the button to receive the OTP.
4. Enter the OTP from that email or phone. If it does not arrive, click Resend OTP.
5. Click Submit OTP.

If this phone or email already has a Razorpay account, the screen lists those accounts. Click Create a new account so this one is only for RROne.

2. Basic details

Type these answers:

1. Full name: the owner's name, the same person who will finish this form and, if asked, join the video call.
2. Mobile number: that person's own number. Enter the OTP they send and continue.
3. Where you accept payments: select Android app. You can also select Website only if the shop has one.
4. Website or app link: paste the RROne Play Store link. If you do not have it open, click Add later.
5. Social media: paste the shop's Facebook, Instagram, or Google Business link if you have one. Otherwise click Add later.
6. Read the summary. If a name or number is wrong, go back and correct it. Then click Continue.

3. Choose the business type

On Registered or Unregistered:

- Choose Registered, then Sole proprietorship, if the shop has a GST certificate or a Udyam / MSME certificate.
- Choose Unregistered, then the individual or unregistered option, only if the shop has neither GST nor Udyam.

Use the owner's personal PAN in both cases. Do not invent a company name.

If you chose Unregistered

1. Enter the owner's PAN. Continue.
2. Razorpay fills the name from that PAN. If it matches the card, click Yes, confirm. If it does not, click Edit PAN and re-enter it.
3. Brand name: choose Other and type RROne.
4. Review and continue.

If you chose Proprietorship

1. Business name: the owner's name as on the PAN. Do not use symbols.
2. Enter the owner's personal PAN.
3. Date of incorporation: the date printed on the GST certificate or the Udyam certificate.
4. Confirm the PAN details when they match.
5. Brand name: Other, then RROne.
6. Review and continue.

4. Business papers, for a proprietorship

They ask for one required paper and one extra paper.

Required, upload any one:

- GST certificate, and type the GSTIN on the form.
- Or Udyam / MSME certificate, and type the Udyam number.

If there is no GSTIN, select I don't have a GSTIN, then upload the Udyam certificate.

Extra, upload any one:

- Shop and Establishment certificate.
- Import Export Code.
- Postpaid mobile bill in the business name.

A prepaid phone bill is not accepted. Review the uploads and continue.

5. Identity check

Razorpay tries to pull the owner's identity from Central KYC.

1. Enter the mobile number that is already linked to the owner's PAN or bank KYC.
2. Click Generate OTP, enter the OTP, and click Verify OTP.

If that succeeds, the name and address fill in by themselves. Continue.

If it fails, use one of these:

DigiLocker

1. Choose Share Aadhaar details via Digilocker. The Aadhaar must be linked to this mobile.
2. Accept the DigiLocker terms.
3. Enter the Aadhaar number, the captcha, and the OTP.
4. Enter the 6-digit DigiLocker PIN.
5. Click Allow so Razorpay can read the Aadhaar. You return to the Razorpay page.

Or upload a proof

1. Choose Upload Identity Proof Manually.

2. Upload a clear photo of the Aadhaar, voter ID, or passport. Both sides if the card has two sides.

For a proprietorship they also ask for the authorised signatory name. Type the owner's name.

6. Shop category and address

1. Category: grocery, supermarket, or food retail. Pick the closest grocery option on the list.
2. Sub-category: the closest match to a neighbourhood grocery store.
3. Average delivery time: the time RROne usually takes after an order, such as the same day. This appears mainly when Central KYC failed.
4. Registered address: the shop's full address in Kavali, including door number, street, city, state, and PIN. Use the address printed on the GST or shop certificate.

7. Bank account

1. Enter the account number and IFSC of the account that should receive customer payments.
2. The account name must match the PAN name.
3. Razorpay sends Rs 1 to that account to prove it is real.
4. If the Rs 1 check fails, upload either a short video of a cancelled cheque, or a letter or email from the branch manager confirming the account.

8. Submit

1. Read every page once more.
2. Click Submit Application.
3. Skip Unlock International. RROne collects rupees inside India.
4. You can click Explore Test Dashboard. Test mode uses practice money only. Customers' real payments stay on cash and the current UPI method until the account is approved.

9. Video call, only if they ask

If Central KYC failed, the screen shows Start Video KYC.

1. Click it. Confirm that the owner is the authorised signatory.
2. Keep the physical PAN and Aadhaar in hand, not photos on another phone.
3. Accept the terms.
4. Allow camera, microphone, and location. Turn off any VPN.
5. A Razorpay agent joins and checks the cards on camera.

10. What the account status means

Status	Meaning
Under review	The form is submitted and Razorpay is checking it.
Needs clarification	They need a clearer document or a correction. Reply on the dashboard.
Activated	Real payments can be collected, and Razorpay will settle them to the bank account.
Rejected	The details were not accepted. Correct them and submit again.

Approval can take a few days. Watch the owner's phone and email.

When the status says Activated, stop there. Do not paste the secret key into chat. The app stays on cash and the current UPI method until that approval, and until the app is changed on purpose.
